

5th CASSINI HACKATHON

24-26 MARCH 2023

DESIGN
TERMINAL
OPTIMISTS FIRST

Develop solutions for defence industry's challenges!

Are you concerned about national sovereignty? Are you interested in defence solutions? Do you like exciting teamwork? Would you like to compete in a European idea competition?

During the CASSINI Hackathon we are looking for solutions that can enhance Europe's defence capabilities and increase national security by using space technologies:

Earth observation

Navigation

Geoinformatics

Develop innovative ideas for one of the hackathon's 3 challenges with the help of our business and industry mentors over the two-day competition in Budapest!

Challenge #1: Cross-terrain mobility, logistics and route planning

Challenge #2: Maritime threats and monitoring maritime activity

Challenge #3: Protecting our critical infrastructure, mitigating economic and societal issues in a crisis situation

Application

31 January - 17 March

Promotion campaign, events

6-14 March

Hackathon

24 March online,
25-26 March hybrid

The event will be held in English. Previous space experience is not a requirement, join from any background, if you have an exciting idea! You can apply individually or in teams of 3-4. Individual applicants will be supported in forming teams.

The winning team of the Hungarian round will receive valuable prizes and the opportunity to present their project in an EU-wide competition.

We look forward to your registration!

More information can be found on the website and on Design Terminal's Facebook page!
